## PREFATORY REMARKS.

AFTER a long lapse of years and the most strenuous exertions, the proprietors of this establishment have succeeded in concentrating an extensive collection of the most valuable Exotic and American trees and shrubs, which have been selected with much care from an immense variety.

The fruit trees offered for sale, are either grafted or inoculated, and are propagated from such Exotic or American varieties as have become most celebrated.

Each tree, when sent from the Nursery, is labelled, and from fifteen to twenty-five trees are usually packed in each matted bundle; and where the trees are to be transported by land carriage, they are packed in boxes, which generally contain from fifty to eighty trees each.

All packages are delivered, free of freight, at New-York, the steamboat making several trips between the city and village daily.

American indigenous trees, shrubs, and plants, and their seeds, suitable for sending to foreign countries, will be supplied in assortments from \$5 to \$500.

The proper seasons for transplanting trees, are October, November, and December, in the fall; and March and April, in the spring. For bulbous flower roots, from July to November. Greenhouse plants can be forwarded at any period, except during the winter months.

Scions of the different fruits suitable for engrafting, will be furnished at 50 cents per dozen, and if a less quantity than a dozen is ordered of any kind, the same charge will be made.

We request that persons at a distance ordering Trees, &c. will direct the payment to be made in New-York, or that some person may be referred to that will become responsible for the same.

The prices of our Trees, Shrubs, and Plants, are uniform with those of the Nurseries in this neighbourhood; and from which we never deviate: to which is added, a reasonable charge for the matts and packing. Where Trees are wanted of an extra large size, they will be charged in proportion.

To such persons as desire Fruit Trees, and are not themselves acquainted with the qualities of the different kinds, we would recommend that they should specify in their orders, the number of trees wanted of each species of fruit, and leave the selection to us, and in such cases they may rely on our sending only those of the most approved sorts; and where desired, those will be sent that ripen in succession.

# CATALOGUE

*Of Fruit and Forest Trees, Flowering Shrubs, and  
Plants; for sale by STEPHEN F. MILLS & Co.  
at Flushing-Landing, on Long-Island, near New  
York.*

PEARS—37½ Cents.

[The varieties of pears are so extensive that, the European and American sorts together would form a list of several hundred. A succession of the best kinds, or what the French term the *circle of pears*, which will afford some of the best sorts for table and culinary purposes throughout the year, may be selected from the following, which are of the most approved kinds. An additional number has been received from Europe, a list of which will be published in the next catalogue. Those marked M, are melting pears—those marked B, are best for baking.]

Primitive	<i>ripe in July.</i>
Little musk, or supreme	do.

Early sugar	<i>ripe in July.</i>

|--|---------------------------------|
| Large orange, or apple                     | <i>ripe in Sept. &amp; Oct.</i> |
| Pear                                       | do.                             |
| Portugal                                   | do.                             |
| Winter                                     | do.                             |
| Chinese, with beautiful flowers and fruit, | \$5 do.                         |

### FIGS—50 Cents.

- Early brown, *great bearer*  
 Late brown  
 Large white, and others

### GOOSEBERRIES, mixed, 25 Cts. assorted by name, 31¼.

[Near two hundred sorts of this fruit have been received from England, from which the following have been selected on account of their large size, time of ripening, or flavour; but it will be in vain to plant the finest gooseberries, if attention is not paid to them after they are set out. There is no fruit tree that requires so rich a soil; they should have rotten manure dug in around them every autumn, and the ground kept mellow and cultivated, and the bushes trimmed, and tops thinned out moderately every year.

#### *Red.*

- |                |                   |
|----------------|-------------------|
| Alcock's king  | Shaw's Billy Dean |

Persian do.	do.	\$1 do.
Spring Crocus, 12 varieties,	75 cents per dozen	
Autumn, or saffron do.	do.	do.
Spring Colchicum, 25 cents each,	2 dollars	do.
Autumn do. 8 varieties,	do.	do.

### DAHLIAS.

The different varieties of this plant produce very splendid flowers:

Single dark purple,	75 cents
Do. pale do.	50 cents
Dwarf do.	do.
Lilac,	75 cents
Brown,	50 cents
Red,	do.
Pink,	75 cents
Crimson,	do.
Yellow,	1 dollar
Scarlet,	do.
Double purple, 6 varieties, each,	\$1.50
Do. pink, 3 do.	do. do.
Do. red, 4 do.	do. do.
Do. Crimson, 4 do.	do. do.
Do. Orange, 3 do.	do. do.
Do. white, 2 do.	do. do.
Do. lilac,	1 dollar 50 cents
Do. black,	2 dollars
Do. copper coloured,	1 dollar 50 cents
Do. scarlet,	2 dollars
Do. bicoloured,	do.

### GREEN-HOUSE PLANTS.

Orange, Lemon, Citron, Shaddock, and Lime Trees, one year inoculated,	2 dollars 50 cents
Ditto, two years do.	3 dollars
Ditto, three do. do. in a bearing state,	\$3.50

Double white Camellia, or Japan Rose, 5 dollars

Double red do. 5 dollars

Do. pink do. do.

Do. striped do. do.

Other double kinds, 5 to 8 dollars

Single red do. 2 dollars

Gardenia, or Cape Jasmin, 2 to 3 dollars

Also, an extensive collection of Heaths, Myrtles, Oleanders, Daphnes, Jasminus, Cyclamens, Aloes, Geraniums, Chinese Magnolias. Olives, Passion Flowers, Phillyreas, Roses, Laurustinus, &c. &c. Catalogues of which will be forwarded if desired.

**SHORT TREATISE**

ON THE MANAGEMENT OF

**FRUIT AND ORNAMENTAL  
TREES, SHRUBS, AND PLANTS.**

THE proprietors, in supplying orders for Trees, and Plants, from the different and most remote parts of the Union and Europe, have frequent applications for directions as to their management; therefore, conclude the following short Treatise will be found acceptable.

When the Trees, &c. are received, if they have been a considerable time out of the earth, let the roots be plentifully watered, ; and if not convenient to plant them within a few days, let a trench be dug in soft ground, the bundles unpacked, and after the roots are well wet, let them be covered up with earth made fine, they can then be planted as soon as convenient, and without injury. In planting, the Trees ought to be set two or three inches deeper than before; and in filling in the earth around the roots, let some old well rotted stable manure be incorporated with the earth, according to the size of the Tree, from one to three shovels full, leaving a hollow or basin around each Tree or Shrub to catch the rain, and convey it to the roots.

The earth around each Tree, Shrub, and Plant, should, at least twice in the spring and summer, be carefully dug up and made light; also, once a year, some old rotted stable manure dug in. It is necessary to be careful not to dig so deep as to injure the roots. No grass or weed should by any means be allowed to grow near the body of a Tree,

Shrub, or Plant: this injures them very much, stops their growth, and they become stunted, and often covered with moss.

If a Tree appears bark-bound and mossy, let it be scrubbed with a brush dipped in very strong soapsuds, and plenty of it applied to the body and lower branches; this softens the bark and destroys the insects—is very beneficial to the Tree, and ought not to be neglected.

#### GOOSEBERRIES.

This fruit requires a strong moist soil, which ought to be kept light and made rich with plenty of old manure; no grass or weeds should be permitted to grow near the body of the bush. As the fruit sets on the young shoots of the previous year's growth, part of the old wood should be trimmed out every autumn, which causes them to grow strong, and produce large fair fruit.

#### GRAPE VINES.

The usual season for planting the Vines is in the spring, but we think the autumn is preferable.—About the last of October, let some old well rotted manure be dug in and intermixed with the earth, about two feet in depth, in each spot where the vine is to be planted out, and in planting the vines, leave a hollow around each one, so as to contain the water; late in autumn cover the Vines with earth and coarse litter, or hay in April uncover them, and train them to a railing made for that purpose.

Cherry Trees do not succeed in a low, heavy soil; they thrive best in a light, rich earth. Peaches will grow well in any soil, provided the earth is kept light around each Tree. Apples, Pears, and Plums, require a heavier soil; but the earth around them ought to be kept rich and mellow; it is much the best to keep the ground cultivated.

## ROSES.

No class of plants so easy of culture as this, yields more intrinsic delights to the amateur; the diversity of size, colour, fragrance, and form, have been varied by art to an almost infinite degree, and in one collection alone in Europe, above 1200 varieties are enumerated. Enduring the rigour of the severest winters uninjured, and yielding with so little attention such a rich accumulation of beauty and fragrance, every garden should possess at least all the more conspicuous varieties of this unrivalled flower.

## CARNATION PINKS.

These should be covered in winter with a box or frame, or taken up with balls of earth, and planted during the winter under a common hot-bed, with or without glass as they bear cold; but not cold and moisture at the same time.
